The origins of the Arkansas River begin high in the Rocky Mountains near Leadville, Colorado. 1469 miles long, the river is the sixth longest in the United States. West of Cañon City, the Arkansas River cuts through a high plateau forming a spectacular steep-walled gorge that is over a thousand feet deep. Called the Royal Gorge it is considered a world wonder, and is often referred to as the Grand Canyon of the Arkansas River.

In 1877, silver was discovered on the upper waters of the Arkansas which led to the start of wars between two competing Royal Gorge railroads. The companies dynamited competitor's railway efforts, exchanged gunshots and hired renowned gunmen of the west for defense. Later, in 1929, Cañon City authorized building the Royal Gorge Bridge, which, at 955 feet (291 m) above

the river, held the record for the highest suspension bridge in the world until 2003. The Royal Gorge has amazing history and breathtaking views. Come join the USAFA Outdoor Adventure Program for rafting trips on the Arkansas River that will be remembered!

All trips meet and depart from the east side of the Outdoor Recreation Center (where the camping trailers are parked) at 6:45 am. and return about 5 pm.

All rafting trips include: Transportation from the Academy to the Arkansas River and back, all rafting equipment and required personal gear, lunch, permits, and guides. Our primary concern is for your safety. All guides are state-certified and hold a First Aid and CPR certification.
